About Codec Technologies

Codec Technologies

Internship Host Organization

- ✓ Internship role: Python Developer Intern
- ✓ Practical exposure to Python development and application building
- ✓ Hands-on work with data processing and visualization
- ✓ Testing, debugging, documentation and GitHub-based project work
- ✓ Project developed: Real-Time Stock Market Dashboard

**PYTHON
DEVELOPER
INTERN**

Internship at a Glance

DESIGNATION

Python Developer Intern

PROJECT

Real-Time Stock Market Dashboard

ORGANIZATION

Codec Technologies Pvt. Ltd.

PROGRAM

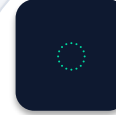

B.Tech CSE — Semester 3

The Stock Market Data Problem

Data Accessibility Problem

Stock market information can be spread across different data sources and can be difficult to interpret without a simple interface that brings key information together.

Visualization Problem

Raw historical prices and trading volumes become more useful when users can select a stock and time period and explore the information through interactive charts.

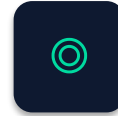

Project Goal: make stock market information easier to monitor, compare and understand through an interactive dashboard.

Project Objectives

01

Develop an interactive stock market dashboard.

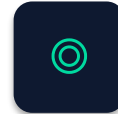

02

Retrieve stock market data programmatically.

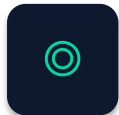

03

Allow users to select stocks and time periods.

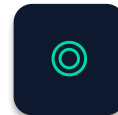

04

Display current market information and key metrics.

05

Visualize historical stock prices and trading volume.

06

Present recent market data and company information.

Technologies & Tools Used

Python 3

Core programming language

Streamlit

Interactive web dashboard

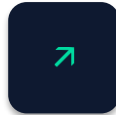

Pandas

Data processing & manipulation

Plotly

Interactive data visualization

yfinance

Stock market data retrieval

VS Code / GitHub

Development & version control

Dashboard Architecture

Market Data Processing Workflow

01

Stock Selection

02

Time Period Selection

03

Retrieve Data
yfinance

04

Process Data
Pandas

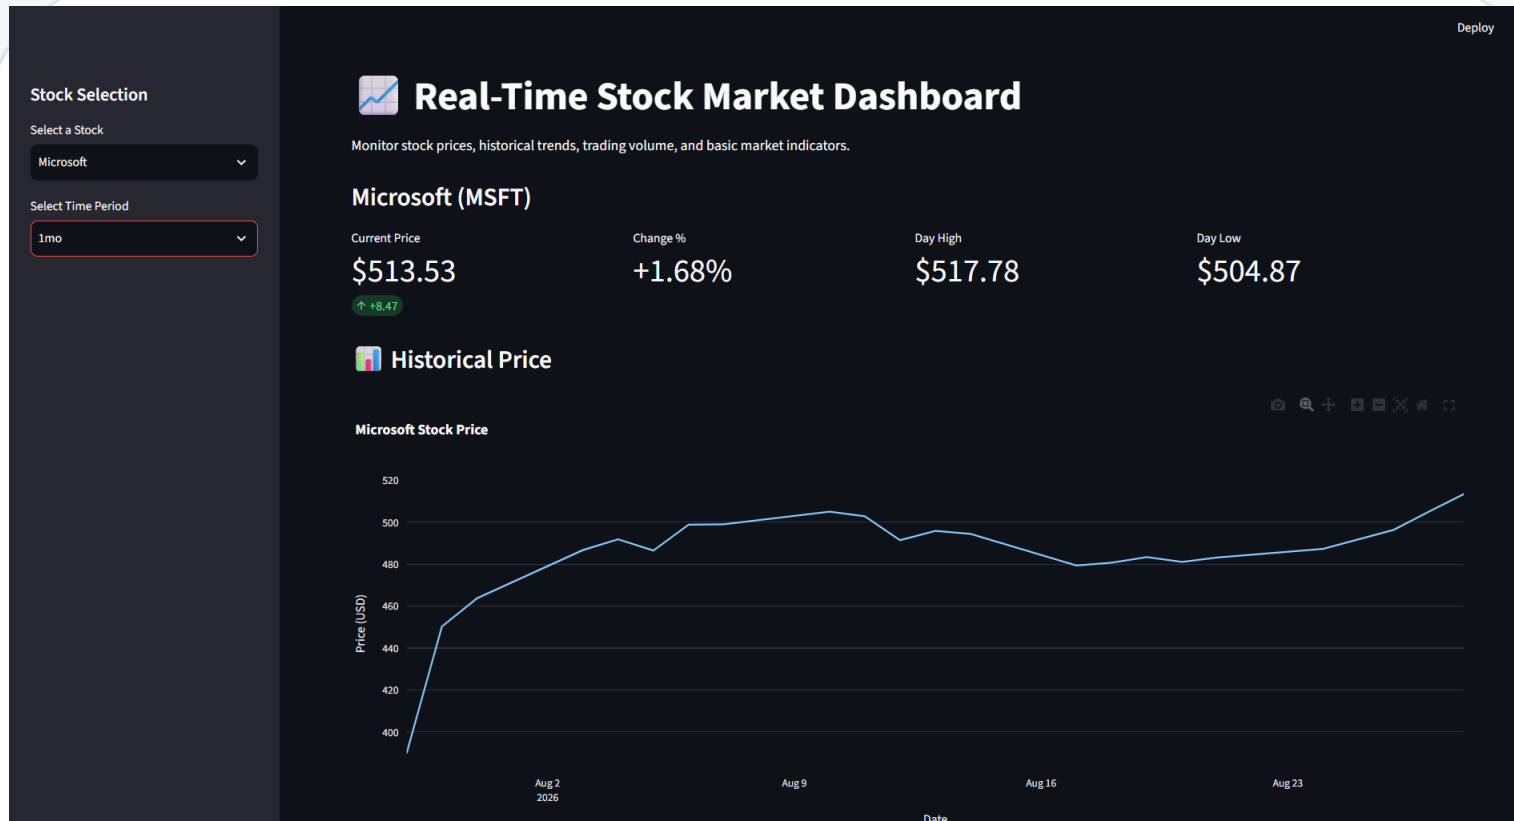

05

Generate Charts
Plotly

06

Display Dashboard
Streamlit

Project Output — Dashboard

Working Real-Time Stock Market Dashboard

LIVE OUTPUT

- ✓ Stock selection
- ✓ Current market metrics
- ✓ Historical price chart
- ✓ Trading volume
- ✓ Recent market data
- ✓ Company information

Project Testing — Data & Stock Selection

PS C:\Users\adit\OneDrive\Desktop\python_internship\project_4_dashboard> python -m streamlit run app.py python -m streamlit run app.py
```

Development / execution evidence

Tests included Apple (AAPL), NVIDIA (NVDA), different time periods and dashboard interactions.

Dashboard Testing & Results

TESTS PERFORMED

- ✓ Stock selection testing
- ✓ Time-period selection testing
- ✓ Current market data verification
- ✓ Historical price visualization
- ✓ Trading volume verification
- ✓ Recent market data verification
- ✓ Company information verification
- ✓ Dashboard interaction testing

RESULT

The dashboard successfully retrieves and displays stock market information through an interactive web interface.

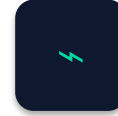

AAPL • NVDA • Multiple time periods

Key Learnings & Takeaways

Python Development

Hands-on development of a Python-based application

Data Processing

Practical use of Pandas for market data

Data Visualization

Interactive charts and visual analysis using Plotly

Dashboard Development

Building an interactive Streamlit application

Testing & Debugging

Verifying functionality across stocks and periods

Version Control

Organizing project work using GitHub

Internship Submission Documents

PDF

Internship Report

Detailed documentation of the internship and project.

PPT → PDF

Internship Presentation

Presentation covering the internship and dashboard.

PDF

Completion Certificate

Official proof of internship completion.
